Career Opportunity: Manufacturing Technician - Junior

Precision ADM is a leader in metal 3D Printing Manitoba and Canada and is dedicated to providing complete engineering and manufacturing solutions to our customers in the Aerospace, Medical and Industrial sectors.

We are a rapidly expanding service provider seeking a full-time motivated entry-level qualified Manufacturing Technician to work in our Subtractive Manufacturing department. Precision ADM will provide additional on the job training in specific equipment and processes as required.

Responsibilities

- Interpret drawings, manuals, specifications, or sample parts to determine finish condition of work pieces, sequence of operations, and set-up requirements.
- Finish parts to engineering specifications
- Remove metal build support structures
- Grind out burrs and sharp edges
- Keep equipment and work area clean and orderly
- Perform basic preventative maintenance functions on equipment
- Observe machine operation to detect issues such as worn or damaged finishing tools
- Conform to all quality, safety, and human resource policies and procedures

Requirements

- Manufacturing Technician 2-year program diploma from Red River College or equivalent
- RCMP background check and meet the requirements of the Controlled Good Program
- Understand how to read drawings and work instructions
- Proficiency with mathematics, measurement tools, power tools, and finishing methods
- Entry-level proficiency with SolidWorks CAD software
- Entry-level ability to operate CNC and manual machining equipment
- Excellent people and communication skills
- Able to lift up to 60 lbs and perform physically demanding work
- Able to work in a fast-paced work environment while being detail oriented with good analytical and reasoning skills
- Have understanding and respect for workplace safety procedures and regulations
- Apprenticeship available depending upon qualifications and chosen career path
